

Product Portfolio

Precision Mold

Nedec aims to be a one stop system from mold design to production. They make and offer optimum molds in order to provide the best quality and customer satisfaction.

Technology

Metal Platform

- Precision Mold
- Die-casting
- Stamping
- Surface Treatment
- Precision Machining
- Assembly

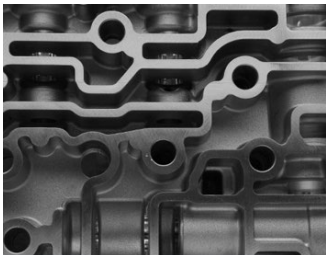

Electronic Parts

Nedec offers high quality electric parts which require precision technology. They have developed a new technology which conforms with market trend and customer needs.

Precision Motor

- FDB Motor
- HDD Motor
- Robot Motor
- Prop & Gimbal Motor
- Fan Motor

Automotive Parts

Nedec offers the best solution when high level reliability and high precision are needed. They are leading the market in electric parts when upgrading a vehicle.

Robotics

- Factory Automation
- Constructor

Precision Motor

Nedec secures a high level of technology and future growth engines by operating a assembly line for precision motor based on the FDB(Fluid dynamic bearing) system.

R & D Center

- Core Projects
- Mechanical Device
- Surface Treatment
- Material Science Lab
- Chemical Analysis (for Cleanliness)

Robot & Drone

In step with manufacture industry trends, Nedec is making history in leadership to allied industries.
