

Their custom thermal insulation solutions include:

- Extreme heat and vibration abatement in race cars.
- Quilted heat shields in aircraft to reduce noise and temperatures and ensure component functionality.
- Spacecraft blanketing to block intense heat during spaceflights.
- Reflective and radiant thermal barriers.

Thermal insulation materials include:

- Lightweight composites, fiberglass, silica, ceramics mineral wool and cellulose
- Foams such as closed-cell, melamine, polyamide, polystyrene, and polyurethane.
- Exclusive materials like Aerogel® (for aerospace-related projects) and Pyrogel®.

Automated Features in the product line include:

- Roll Slitting Machine
- Automated Webbing Cutters
- Welding Machine
- CNC Cutting
- Programable Sewing
- CAD / CAM Design
- Steel Rule Die Cutting

Their Industries include:

- Military
- Industrial
- Performance
